SILICON VALLEY FELLOWSHIP

THE PROJECT

The Silicon Valley Fellowship is a week-long program that allows qualified fellows to visit the San Francisco Bay Area and participate in talks and events held in and around the city of San Francisco. It's a packed networking program and a unique opportunity to deep dive into the multifaceted aspects of life in Silicon Valley, getting in contact with Big Tech professionals, faculty and students of top world-ranked universities, and founders of successful companies.

The Silicon Valley Fellowship's mission is to provide the opportunity for young professionals to get in touch with academic and entrepreneurial excellence of the technological, economic, and social sectors of one of the most dynamic contexts in the world – Silicon Valley. This experience has already inspired **hundreds of fellows** and has changed the lives of many who are ready to tell their stories. With it, we strive to **shape the next academic and entrepreneurial class**.

THE PROGRAM

We value the importance of a highly customized experience. This is why programs vary for each batch, tailored based on the participants' interests and backgrounds. Below is a program sample.

Day 0	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6
